Mumbai, Maharashtra | rushikeshkale.2108@gmail.com | github.com/Rushikesh0821

OBJECTIVE

Motivated and detail-oriented Data Science and AI undergraduate with a strong foundation in Python programming, machine learning concepts, and data analysis using Excel and SQL. Passionate about uncovering insights from data and building predictive models that solve real-world problems. Eager to contribute analytical skills and a continuous learning mindset to an organization offering hands-on experience in data science, analytics, or machine learning.

EDUCATION

BSc. Data Science and Artificial Intelligence

Bhartiya Vidya Bhavan's

Currently Pursuing — 2nd Year | CGPA: 7.68

Higher Secondary Certificate (HSC) — Science

Navjeevan Junior College of Science and Commerce

TECHNICAL SKILLS

- Programming Language: Python — writing scripts for data cleaning, analysis, and automation
- Machine Learning (ML): building and evaluating predictive models to extract patterns and insights from data
- Microsoft Excel: data analysis using formulas, pivot tables, charts, and dashboards
- SQL: writing queries to retrieve, filter, and manage structured data from databases

CORE COMPETENCIES

- Data Analysis & Interpretation
- Problem Solving & Analytical Thinking
- Attention to Detail
- Quick Learner & Adaptable to New Tools
- Effective Communication

AREAS OF INTEREST

Deeply interested in working with data and applying Machine Learning and Python to analyze it, uncover trends, and generate actionable insights. Enjoys exploring how data-driven approaches can be used to solve practical, real-world problems.

LANGUAGES KNOWN

English, Marathi, Hindi
